**WORLD HEALTH ORGANIZATION  
General Director  
Mr Tedros Adhanom Ghebreyesus**

Dear Mr. General Director,

We use this opportunity to express our personal respect to the Director General of the World Health Organization, Mr. Tedros Adhanom Ghebreyesus, and ask you to consider the submitted ANNEX - CONVENTION ON ACHIEVING "HEALTH FOR ALL - WITHOUT COMMERCIALIZATION".

It is noted that the member states of the World Health Organization, regardless of the model of the health system (Bismarck, Beveridge, Semashkov, Market and Private), responded unprepared to the appearance, course and post-pandemic status of the virus, which is why the entire humanity today and in the future is in an extraordinary situation. a difficult situation with catastrophic and uncertain consequences.

It is confirmed that the World Health Organization, respecting the established general principle "Health for all", incorporated health as a human right in all its documents, however, we note with regret that with many invisible factors, health is becoming more and more a commodity and less and less a right.

The primary goal of the delivered Convention on the realization of "Health for all - without commercialization" is the prohibition of commercialization in healthcare > market relations > ensuring profit, providing conditions for the reduction/destruction of the present pandemic corruption/robbery in healthcare, with the full realization of health as a human right and the prohibition of health as goods in all segments of healthcare.

We ask the Director General of the World Health Organization, Mr. Tedros Adhanom Ghebreyesus, to take the submitted convention into consideration, analyze it, make his position/opinion, and submit the same to all member states of the World Health Organization for consideration with the possibility of accepting it.

With the conviction that accepting the content of the delivered Convention on the achievement of "Health for All - without commercialization" will save humanity from future certain catastrophic consequences for which there is currently no solution.

Convinced that you will formulate your position/opinion on the delivered convention and deliver it via e-mail, we sincerely thank you.

And finally, I would like to repeat my expressions of personal respect to the Director General of the World Health Organization, Mr. Tedros Adhanom Ghebreyesus.

**In Attachment:**

- Convention – English
- Convention - Regional language

Belgrade, Zagreb and Sarajevo on April 7, 2024.
